

Test Summary Report

Project: Online Banking Application
Prepared by: Salma Abdelaleem
Date: July 2025

Objective

To validate the functionality and stability of the Online Banking Application through manual testing.

Summary of Testing

Metric	Count
Total Test Cases	40
Executed	40
Passed	35
Failed	5
Total Bugs Logged	5
High Severity	2
Medium Severity	2
Low Severity	1

Key Findings

- Core modules (Login, Fund Transfer, Bill Payment) are stable.
- Minor UI and sorting issues remain open.
- Security module needs revalidation due to session timeout defect.

Recommendations

- Fix critical and high-severity defects before production release.
- Perform regression testing after fixes.
- Consider automation for repetitive scenarios.

Overall Status

Application is functional with minor issues pending resolution.
